

MEMO: Steven's Creek Maintenance Policy

Property Owners are responsible for maintaining the portion of any creek that is on, or abuts their property and should maintain a clean and proper flow of the creek in general. The Public works department will only maintain areas of the creek that abuts village property. Creek maintenance activities and removal of obstructions that impede the normal flow of the stream will be restricted to property the village has legal rights of access to. Natural snags and other obstructions will generally not be removed unless they severely impede the normal flow. Any individual request for expenditure of funds for maintenance activities on private property will need to be authorized by the village board.
